

Aleppo Pine

Pinus halepensis

- Thrives in full sun
- Moderate water use
- Tolerant to a variety of soils
- Low maintenance: some needle clean up and light pruning on young trees.

The Aleppo pine is an evergreen tree that is conical / pyramidal shaped. Moderate growth rate, growing to 30 – 60 feet tall and has a 20 - 40 feet spread. The Stone pine has short 2 – 4 inch green needles and has 3 inch oval cones. No significant flowers.

Planting suggestion:

Find a location that has full sun exposure and is far enough away from structures and power lines. The Aleppo pine is a very large tree and will need plenty of room to grow and flourish.
