Let's Change and Save Lives

The mission of Tree Fresno is to transform the San Joaquin Valley with trees, greenways and beautiful landscapes.

Value Proposition

Trees and green spaces help us connect with nature and restore our health, ability to learn, happiness and spirit. Trees shelter, filter, produce oxygen and food and support wildlife. Tree Fresno is essential to the wellbeing of the San Joaquin Valley.

What We Stand For

Education

We believe environmental stewardship saves lives and is a responsibility of every citizen.

Park & Greenways

We believe common green spaces are essential for our health and economic well-being.

Vibrant Communities

We believe beautiful landscapes change lives and build a sense of community

Tribute Groves

We believe planting a Tribute Tree is a meaningful way to honor veterans, friends, family and community leaders.

Resource Conservation

We believe the air quality, water and energy conservation benefits of trees merit substantial investment.

Our Big Goals

Teach the art of living green to every citizen. Help make the landscapes at Fresno State an inspiration for the region.

Raise the Fresno ParkScore from last to the top 10% in the nation.

Develop the Valley Arboretum, a system of greenways, as a signature amenity for the region.

Transform rural cities and urban districts with Community Landscapes Plans.

Establish a Veteran's Grove and Tribute Grove in every city in our region.

Demonstrate how trees and greenways reduce air pollution, energy use, storm water run-off and groundwater contamination.

"What would our lives be like if our days and nights were as immersed in nature as they are in technology?"

-Richard Louv,
The Nature Principal
